

ALUCOBOND®

timberAL

ALUCOBOND® timberAL
unifies the aesthetic beauty of timber
with the strength of ALUCOBOND®

THE WORLD LEADER IN ALUMINIUM COMPOSITE MATERIALS

ALUCOBOND®
40 years
of excellence

ALUCOBOND® timberAL finishes unify the natural beauty of timber and the outstanding features of **ALUCOBOND®** aluminium composite panels to enhance the design of your architectural project.

ALUCOBOND® timberAL is available in 5 modern timber patterns. It offers the same unequalled material properties for which all **ALUCOBOND®** products are known: extraordinary flatness and rigidity, excellent formability, low weight and outstanding weather resistance. The use of a high quality paint system applied in a continuous coil-coating process ensures that the timber look is not compromised for many decades to come.

ALUCOBOND® timberAL surfaces are easy to clean and care for. It is the ideal material for Interior and Exterior Architecture, and just another reason why **ALUCOBOND®** is "The world leader in aluminium composite materials".

Selecting **ALUCOBOND® timberAL** for projects which require environmental friendly materials is literally a natural choice, **ALUCOBOND®** is fully recyclable.

Dark Zebrano 850

Redwood 851

Royal Cedar 852

Elegant Oak 853

Manitoba 854

Note

ALUCOBOND® timberAL is available in **ALUCOBOND®** and **ALUCOBOND® plus**. It is recommended that all **ALUCOBOND® timberAL** panels required for a project or an elevation of a project originate from the same production batch. Furthermore, panels should be installed in the same direction as marked on the protective peel-off foil. As with real timber, however, it is not possible to ensure a 100% uniformity in colour, pattern and brightness.

For more information and available specification please refer to the manufacturer or your nearest **ALUCOBOND®** representative.

ALUCOBOND®
